## HDcctv Megapixel 720p 3-Axis Outdoor IR Vandal-Proof Bullet Camera

EZH5040

EVERFOCUS ELECTRONICS CORPORATION

## **Operation Instruction**

© 2011 EverFocus Electronics Corp

Please read this manual first for correct installation and operation. This manual should be retained for future reference. The information in this manual was current when published. The manufacturer reserves the right to revise and improve its products. All specifications are therefore subject to change without notice.

All rights reserved. No part of the contents of this manual may be reproduced or transmitted in any form or by any means without written permission of the EverFocus Electronics Corporation.

#### PRECAUTIONS

1. Do not install the camera near electric or magnetic fields.

Install the camera away from TV/radio transmitters, magnets, electric motors, transformers and audio speakers since the electromagnetic fields generated from these devices may distort the video image or otherwise interfere with camera operation.

- 2. Never disassemble the camera beyond the recommendations in this manual nor introduce materials other than those recommended herein. Improper disassembly or introduction of corrosive materials may result in equipment failure or other damage.
- Try to avoid facing the camera toward the sun. In some circumstances, direct sunlight may cause permanent damage to the sensor and/or internal circuits, as well as creating unbalanced illumination beyond the capability of the camera to compensate.
- 4. Keep the power cord away from water and other liquids and never touch the power cord with wet hands. Touching a wet power cord with your hands or touching the power cord with wet hands may result in electric shock.
- 5. Never install the camera in areas exposed to oil, gas or solvents. Oil, gas or solvents may result in equipment failure, electric shock or, in extreme cases, fire.

#### 6. Cleaning

For cameras with interchangeable lenses, do not touch the surface of the sensor directly with the hands. Use lens tissue or a cotton tipped applicator and ethanol to clean the sensor and the camera lens. Use a damp soft cloth to remove any dirt from the camera body. Please do not use complex solvents, corrosive or abrasive agents for cleaning of any part of the camera.

7. Do not operate the camera beyond the specified temperature, humidity or power source ratings. This camera is suitable for indoor and outdoor operation. Use the camera at temperatures within -10°C~50°C (14°F~122°F) and in an IP67 compliant environment; this device is not rated as submersible. The input power source is 12VDC/24VAC. The use of properly fused or Class 2 power limited type supplies is highly recommended.

#### 8. Mounting

Use care in selecting a solid mounting surface which will support the weight of the camera plus any wind, snow, ice or other loading, and securely attach the camera to the mounting surface using screws and anchors which will properly support the camera. If necessary (e.g. when mounting to drop ceilings) use a safety wire to provide additional support for the camera.

## CE

**ATTENTION!** This is a class A product which may cause radio interference in a domestic environment; in this case, the user may be urged to take adequate measures.

#### Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures :

- •Reorient or relocate the receiving antenna.
- •Increase the separation between the equipment and receiver.
- •Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- •Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the users' authority to operate this equipment.

## **1. Product Overview**

The EZH5040 is an HDcctv 3-Axis outdoor bullet camera with True Day/Night capability in an IP67 vandal resistant housing. Based on a Sony 1.3 megapixel progressive scan sensor for HD 720p resolution 100% digital images, it delivers vastly superior video quality compared to traditional CCTV images. This superior resolution not only captures more critical evidentiary information, but the inherent ability for megapixel video also extends the area of coverage, expedites completion of investigations, resolves complaints and reduces both capital and operational costs. Designed with long lifespan IR LEDs, the EZH5040 can capture images at up to 45m (~150 ft.) in low or no light environments.

No major upgrade to the IT network is required to deploy this powerful technology; HDcctv cameras communicate at digital speeds up to 1.5Gb/s over existing or new coaxial cable (RG59 or other types for longer distances), using industry standard BNC connectors. With its 3-Axis positioning and varifocal 3-9mm megapixel auto iris lens the EZH5040 delivers flexible, robust coverage in a wide range of demanding surveillance environments while delivering stunning HD image quality.

#### 1.1 Features

- HDcctv Alliance Base Line Compliance
- HDcctv Megapixel real time 1280x720 HD video over coax
- Supports video outputs of 720p25/30/50/60 (field select)
- True day/night operation with automatic ICR module
- Includes DNR to improve picture clarity while enabling DVRs to improve disk storage utilization
- 3-Axis positioning for flexible mounting and aiming
- 3~9mm AI VF megapixel lens captures the desired field of view
- Extended IR range of up to 45m (~150 ft.)
- Easy to use OSD setup menu
- SD TV Out for aim and focus using a standard hand held test monitor
- Dual Voltage Power Source 12VDC/24VAC
- Vandal Resistant
- Weather Proof IP67 rated

The HDcctv Alliance states

Look for the unique HDcctv logo to be sure:

- O 100m transmission over even low-grade RG59
- O Plug-and-play interoperability with other compliant products
- O Forward compatibility with future versions of the standard
- O See <u>www.hidefcctv.org</u> for details

### 1.2 Accessory Parts List

Please be careful when you unpack the box due to the electronics devices inside. Check and make sure that you have all the items listed below inside the original box:

HD CCTV Digital Video Camera	
SERVICE VIDEO OUTPUTTEST CABLE	
L WRENCH	7
OPERATION MANUAL	10
SCREW - 4ea Plastic anchors - 4ea	lolo MV

**Please Note:** If an item appears to have been damaged in shipment, replace it properly in its carton and notify the shipper. If any items are missing, notify your EverFocus Electronics Corp. Sales Representative or Customer Service. The shipping carton is the safest container in which the unit may be transported. Save it for possible future use.

## 2

## **2. Installation**

#### Adjusting camera mounting position

<Cable Concealed Inside Bracket>

#### External Zoom & Focus Adjustment

Locking Screws

NEAR

The External Zoom and Focus system provides easy camera installation without opening the Camera Body to adjust lens zoom and focus. Turn locking screw counter clockwise until ring is free to move. After adjustment turn locking screw Clockwise to secure. Please DO NOT remove locking screw completely.

O

 $\cap$ 

FAR

WIDE

NOTE: If these controls are moved very quickly, it is possible to disengage the internal magnetic couplings. This is easily fixed by sliding the control slowly across the entire range. As the magnets pass, they will reconnect.

#### Service Video Out & OSD Control

#### \*\*NOTE:

- 1. Separate two parts of the power adaptor
- 2. Remove the part with the screws
- 3. Attach it to the wire
- 4. Reconnect to end of cable

# Chapter 3

## 3. OSD Menu & Configuration

This chapter introduces how to configure the camera OSD menu.

- Menu structure
  - Main Menu

- VIDEO OUT Menu

#### - LENS Menu

- EXPOSURE Menu

#### - WHITE BALANCE Menu

#### - DAY / NIGHT Menu

#### · ICONS

- 🔁 : Value adjustment(use LEFT/RIGHT button).
- 🗗 : Select Sub Menu(use SET button).
- 🤳 : Execution command(use SET button).
- 🚺 : Return to previous menu.
- 🕀 : Menu OFF.
- 🛑 : Information.

The [SETUP] menu will show up when you push the SET button

#### • Main Menu

- VIDEO OUT : Select SDI Out format and TV Out format.
- LENS : Select the IRIS TYPE and adjust IRIS control value.
- EXPOSURE : Adjust Exposure control.
- WHITE BALANCE : Adjust White balance control.
- DAY / NIGHT : Day / Night control.
- IMAGE : Apply Image processing effects.
- SPECIAL : System setting, IO setting, USER SET setting
- EXIT : Close OSD Menu.
- SAVE & EXIT : Save and Close OSD Menu. These settings are
  - loaded and applied automatically when the Camera is power on

#### • Video Out

[ VIDEO OUT ]						
≉ SDI ≉ TV OUT	FORMAT FORMAT	720p 60Hz NTSC				
1JESC ⇔EXIT ⇔SAVE&E	EXIT					

#### - SDI Format

Select SDI output Formats – 720p 30Hz, 720p 60Hz, 720p 25Hz and 720p 50Hz.

#### - TV Out Format

Select NTSC / PAL. Note : NTSC or PAL Video Format can be selected by pressing the RIGHT Button even when the OSD Menu is turned off - ESC Back to the previous

#### • LENS

[LENS]	
≉ LENS TYPE ≉ BRIGHTNESS ≉ IRIS SPD	DC IRIS 123 1
ບESC ⇔EXIT ⇔SAVE & EXIT	

#### - LENS TYPE DC IRIS.

#### - BRIGHTNESS

Using Left / Right button, adjust Brightness value.

#### - IRIS SPD

Using Left / Right button, adjust Iris speed value.

#### • EXPOSURE

[EXPOSURE]	
≉ BRIGHTNESS ௴SHUTTER ≉ AGC MAX ≉ BLC	123 AUTO 10 OFF
<b>ປ</b> ESC ⊕ EXIT ⊕ SAVE & EXIT	

#### - BRIGHTNESS

Same as the BRIGHTNESS value in LENS Menu. Using Left / Right button, adjust Brightness value.

#### - SHUTTER

Using Set button, go to the SHUTTER sub menu.

#### - AGC MAX

Using Left / Right button, adjust AGC Max value.

#### - BLC

Using Left / Right button, select on/off of Back-Light Compensation Control.

#### • SHUTTER (Sub Menu)

[ SHUTTER ]	
≉ MODE ≉ SHUT LEVEL	MANUAL 1
tJESC ⇔EXIT	
SAVE & EXIT	

#### -- MODE

Using Left / Right button, select Shutter Control modes – AUTO, MANUAL and FLK 60Hz (FLK 50Hz).

AUTO	Auto Exposure mode	
MANUAL	Manual Exposure mode	
FLK 60Hz (FLK 50Hz)	Flickerless mode (Default)	

#### - SHUT LEVEL (Shutter Level)

This menu can be accessed when the Shutter Speed is set to MANUAL. Use the Left / Right button to adjust the shutter speed control level.

Instead of using the default conventional shutter speed of 1/60,

you may choose other speeds. The speeds corresponding to the value of shutter level are listed below.

Shutter Speed	1/50	1/60	1/100	1/120	1/250	1/500	1/700	1/ 1000	1/ 1600	1/ 2500	1/ 5000	1/ 7000	1/ 10000
Level	178	169	142	135	105	65	46	32	20	12	6	4	3

#### • WHITE BALANCE

[ WHITE BALANCE ]	
≉ MODE ≉ R GAIN ≉ B GAIN	MANUAL 100 100
UESC ⇔EXIT ⇔SAVE & EXIT	

#### - MODE

Using Left / Right button, select White balance modes – ATW, PUSH and MANUAL.

ATW	Auto Trace White Balance mode
PUSH	White Balance Push Lock mode (Auto White Balance Control & Lock)
MANUAL	Manual White Balance mode

#### - R GAIN

This menu appears on screen when MANUAL is selected. Using Left / Right button, adjust Red Gain.

#### -B GAIN

This menu appears on screen when MANUAL is selected. Using Left / Right button, adjust Blue Gain.

#### \* NOTE

R GAIN and B GAIN is correlated with the G GAIN internally, so the R GAIN and B GAIN may increase or decrease with the other color gain.

#### • Day / Night

[ DAY / NIGHT ]	
<ul> <li>DAY LEVEL</li> <li>DAY LEVEL</li> <li>NIGHT LEVEL</li> </ul>	AUTO 50 100
UESC ⇔EXIT ⇔SAVE & EXIT	

#### - MODE

Using Left / Right button, select modes - AUTO, COLOR, and BW.

AUTO	Controlled by Signal from CDS sensor. (Photocell)		
COLOR	Fixed Day State. Color Image.		
BW	Fixed Night State. BW Image.		

#### - DAY/Night Levels

This menu can be displayed by selecting AUTO or EXT in the MODE Menu. The Day Level and Night Level thresholds function independently from each other.

#### - DAY LEVEL

The threshold of change from B&W Mode to Color Mode can be adjusted with values between 0 - 127. A lower value will prevent the camera from switching to Color until the scene becomes brighter.

#### - NIGHT LEVEL

The threshold of change from Color Mode to B&W Mode can be adjusted with values between 0 - 127. A higher value will prevent the camera from switching to B&W until the scene becomes darker.

Note: These is a built in offset between the Day and Night Level to prevent a switching level conflict. The effective Day level can not be set lower than the Night level

• IMAGE

- SHARPNESS: Using Left / Right button, adjust sharpness value.
- IMAGE FLIP: Using Left / Right button, select Flip modes OFF, H FLIP, V FLIP and H/V FLIP.
- DNR: Using Left / Right button, select Digital Noise Reduction Modes OFF, LOW, MID, HIGH.
- GAMMA: Using Left / Right button, adjust gamma control setting.
- SPECIAL

[SPECIAL]	)

SYSTEM INFO

Display Camera Version, SDI IF F/W Version & other information.

#### - USER SET

Using Set button, display [USER SET] sub menu.

#### - FOCUS MODE

In focus mode, the iris becomes fully open, electronic shutter controls the light level, and the TV out screen zooms into the center in order to make focusing easier. When in Focus Mode, the OSD Menu is not displayed. The OSD Menu can be toggled ON and OFF using the Left / Right button.

> TV Out Image

FOCUS MODE ON

#### - LANGUAGE

Select OSD Language. (Only English is available, currently)

#### • USER SET (Sub Menu)

- SAVE USER SET					
	[ USER SET ]		Saves a copy of the current configuration set by the user into a separate memory area. If user set data has been saved, an [O]		
	J SAVE USER SET J LOAD USER SET J CLEAR USER SET	[X]	mark is displayed and if not, an [X] mark is displayed. User Set settings can NOT be loaded automatically when the camera is powered on. They can only be loaded manually via the "LOAD USER SET" OSD choice. To make the values in a User		
	لم FACTORY RESET لم CAMERA RESET		Set become the configuration loaded when the camera is powere on, first load that User set, then choose "SAVE AND EXIT" in any of the OSD Screens; the current User Set OSD Settings will be written to the power on configuration. These steps effectively cop a User Set to the power on configuration.		
Į	tu ESC ⇔EXIT				
1	- LAII		- LOAD USER SET		
Load the saved user set, and applies to Camera.					
-			- CLEAR USER SET		
			Clear all saved user set.		
			- FACTORY RESET		
			Clear all setting and initialize to factory setting.		
			Clear user set.		
			- CAMERA RESET		
			Reboot the Camera
